

Stepladders

Installation:

Remove the old running boards and clean the running board brackets. Before installing the new footpegs, lubricate the spring and footpeg pin. When installing the new footpegs, make sure that the footpegs are fully seated on the shaft pin. Once the footpegs are installed, check that all the replaceable stainless steel bolts on the footpegs are tight and that they are not turning. Before the first ride, test that the footpegs are well fitted.

Maintenance:

If there is any wear or damage, the footrests must be replaced.

Riding a motorcycle can be dangerous and using the grips will not prevent injury.

The manufacturer is not responsible for injuries that may occur.

Environmentally dispose of the product at the end of its useful life.
