

Special goggles of the highest quality intended for motocross, enduro and MTB. The goggles were designed to provide motorcycle or moped riders with sufficient eye protection while riding.

Warning for users:

- Riding a motorcycle can be dangerous, and using goggles will not prevent injury. The goggles are not designed to protect the rider in the event of a severe impact with hard objects. The goggles provide the rider with additional protection against dirt, but they will not protect the rider in the event of an impact or fall.
- The strap is adjustable using a sturdy buckle. If the strap length is adjusted correctly, the goggles will remain in their original position during the ride. The user must adjust the strap so that the goggles fit securely over the eyes while still being comfortable.

Maintenance: The goggles must be stored in a clean, dry place at a temperature between 5 and 30 °C. Clean the goggles after each use with a damp antistatic cloth. **DO NOT USE ANY CHEMICAL CLEANING AGENTS - THIS COULD REDUCE THE RESISTANCE OF THE GOGGLES.** To avoid damaging the goggles during transport or handling, we recommend keeping the goggles in a separate case. If the following cleaning instructions are followed, the goggles should not be subject to excessive wear during normal use. However, contact with various abrasive particles, improper handling, or rough cleaning may damage the goggles. Any such damage may be dangerous. In such a case, we recommend replacing the goggles as soon as possible.

ONLY GOGGLES BELONGING TO A SPECIAL CATEGORY MAY BE USED FOR RIDING AT NIGHT OR IN POOR VISIBILITY.

Lens replacement: according to the enclosed manual.

THE PRODUCT IS INTENDED FOR SPORTS PURPOSES.

Dispose of the product in an environmentally friendly manner at the end of its service life.
